Session Descriptions

Instrumental Ensembles

Looking at different musical genres with opportunities for listening, composing and performing.

Music Technology Sessions

This session will offer you the chance to work with an online Digital Audio Workstation (DAW). You will learn how to create music electronically and learn production techniques such as looping, automation, sampling as well as creating music for specific purposes. E.g. music for adverts, films etc.

You will need a laptop or desktop computer for this session. You will also need to use Chrome as your web browser.

Have a Bash Sessions

A chance to play your instrument and 'have a bash' through something different each week.

There will be no pressure to rehearse, record or perform these. We'll cover lots of different styles and even try to include pieces **you** would like to learn and how to go about doing that, sometimes without even having written music in front of you. There will be two groups, one for players at grade 1-3 standard, and one for grade 4 and above standard.

Theory

Improve on your music theory knowledge. These groups are split by grades: Grade 1 – 3 and Grade 4 and above.
